Success Story

74-year-old female was admitted to Morrow Home for rehab following a displaced trimalleolar fracture. Patient received physical and occupational therapy six days a week so she could return home as soon as possible. Patient received extensive ankle ROM exercises to increase strength in ankle and improve mobility. Patient also had to learn how to put on ankle brace and negotiate stairs with one rail and cane. After receiving therapy, she was able to return back home to her private residence.
