

STEPS
for admission

1. Return a completed application and signed medical release form to the Adult Living Services Housing Coordinator's office.
2. Once your application has been reviewed, then our staff will contact you with the status of the application. If the application is accepted, we will place the potential resident's name on a waiting list based on availability.
3. When availability could be possible, our nurse will contact you to set up an assessment to determine which living setting may best meet your needs.
4. If the assessment determines that we are able to meet the needs of the potential resident, the potential resident is placed on the possible admission list for that setting.
5. An appointment is then scheduled with your primary care provider for the potential resident to complete the medical provider report and POST form together.
6. An apartment/room is determined once staff has received all necessary paperwork.
7. Once all the above is in place, we can then confirm an admission date.
